MoSCoW – Library Management System

Aim

To categorize requirements using MoSCoW method.

Procedure

1. List all requirements.

2. Analyze impact & feasibility.

3. Categorize into:

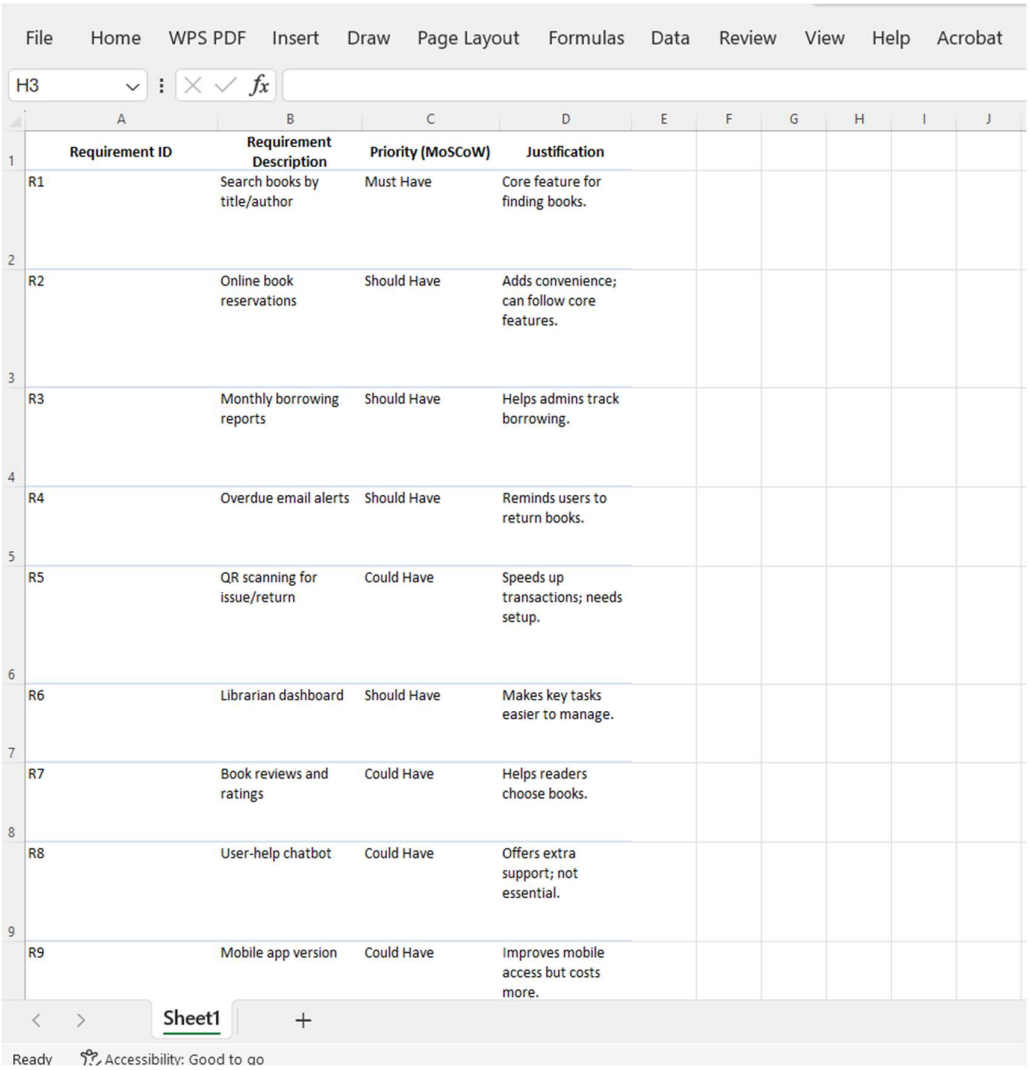

●Must Have , Should Have

●Could Have

●Won't Have

4. Enter into Excel/Google Sheet.

5. Add justification column

Requirement ID	Requirement Description	Priority (MoSCoW)	Justification
R1	Search books by title/author	Must Have	Core feature for finding books.
R2	Online book reservations	Should Have	Adds convenience; can follow core features.
R3	Monthly borrowing reports	Should Have	Helps admins track borrowing.
R4	Overdue email alerts	Should Have	Reminds users to return books.
R5	QR scanning for issue/return	Could Have	Speeds up transactions; needs setup.
R6	Librarian dashboard	Should Have	Makes key tasks easier to manage.
R7	Book reviews and ratings	Could Have	Helps readers choose books.
R8	User-help chatbot	Could Have	Offers extra support; not essential.
R9	Mobile app version	Could Have	Improves mobile access but costs more.

Result: Thus, The Requirements categorized successfully using MoSCoW prioritization
